Grille de numération et petits jeux

Imprimer sur un papier épais et plastifier la page pour conserver les caches plus longtemps.

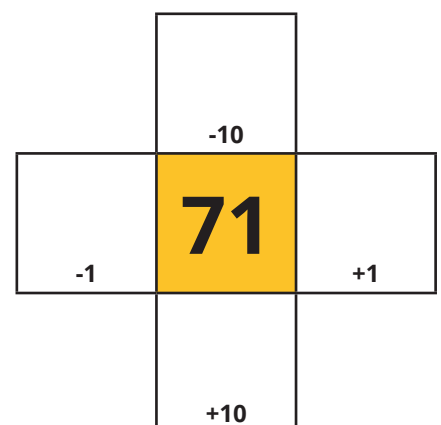

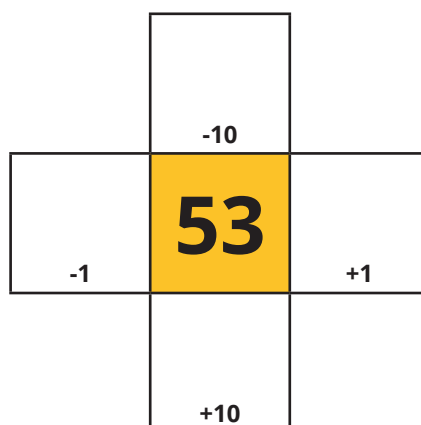

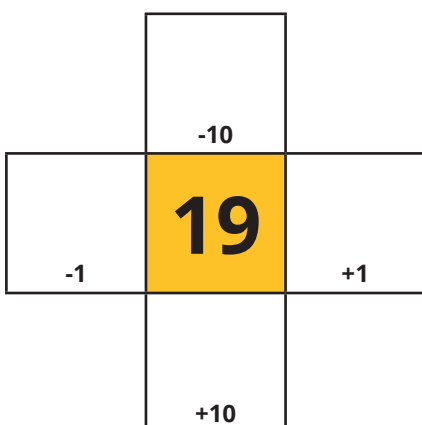

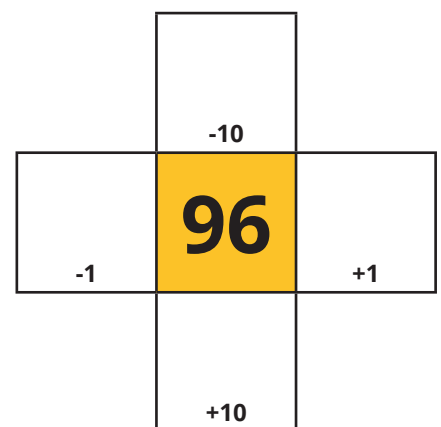

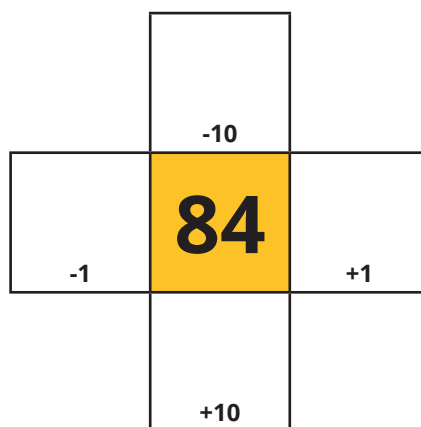

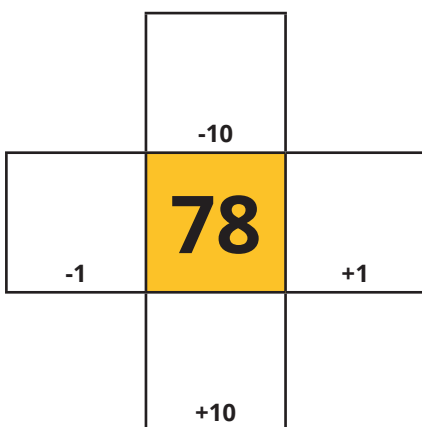

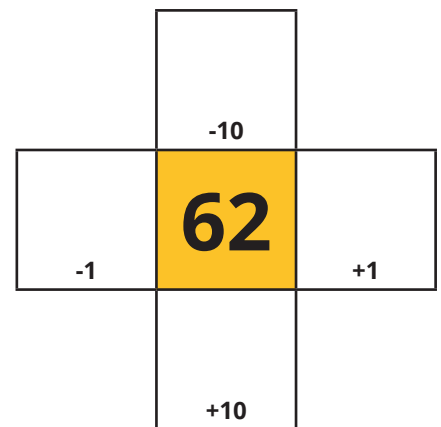

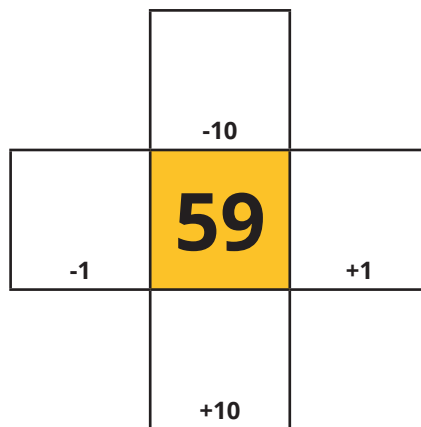

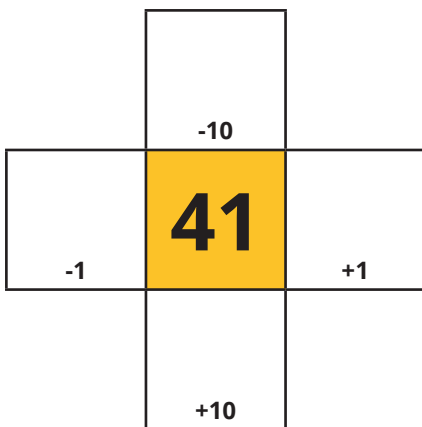

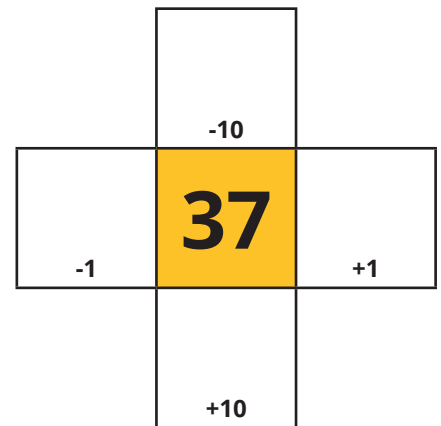

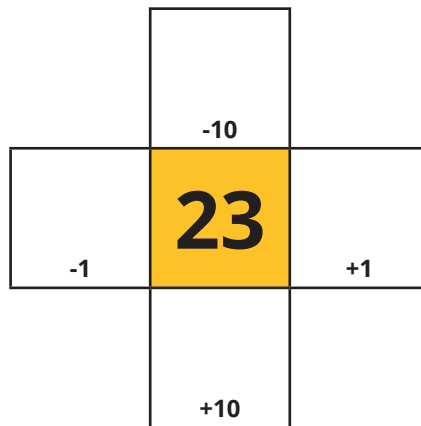

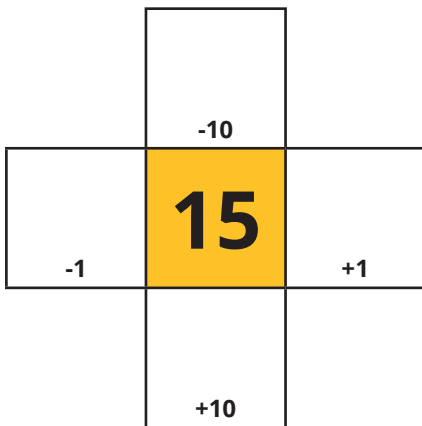

1. Couper le contour du carré jaune. Evider la partie blanche en coupant sur les lignes. Positionner le cache sur la grille pour découvrir le nombre -10 , $+10$, -1 , $+1$.

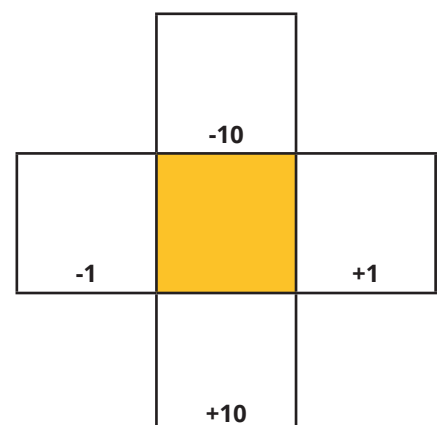

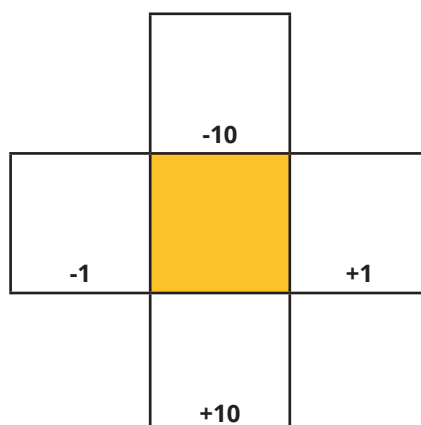

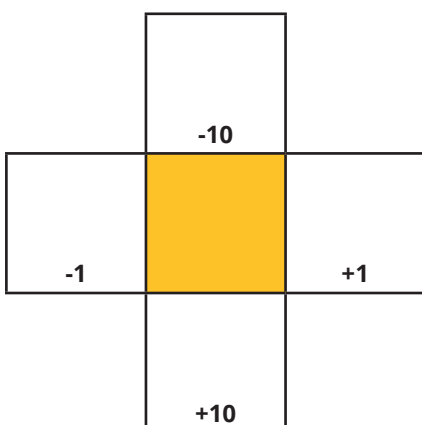

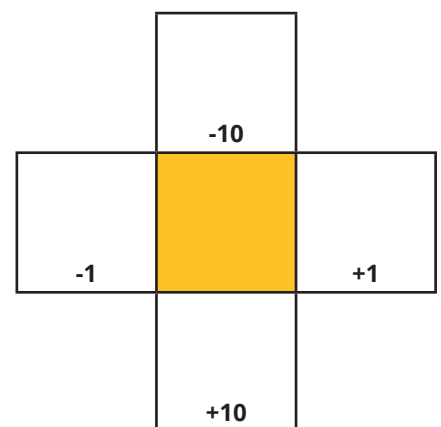

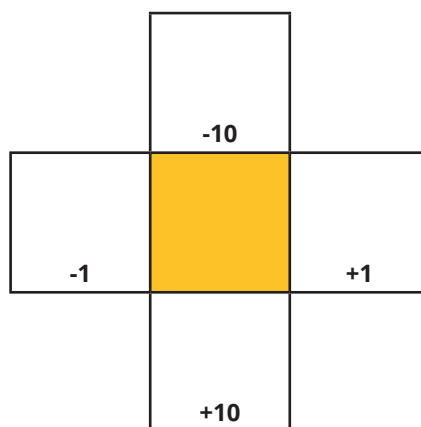

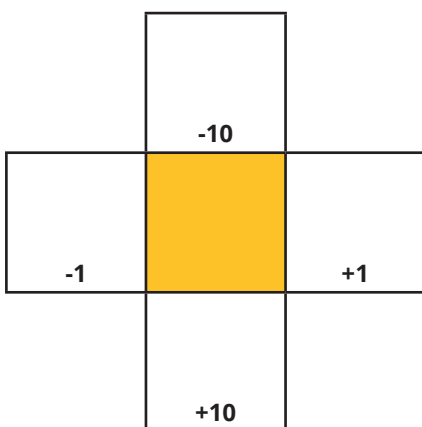

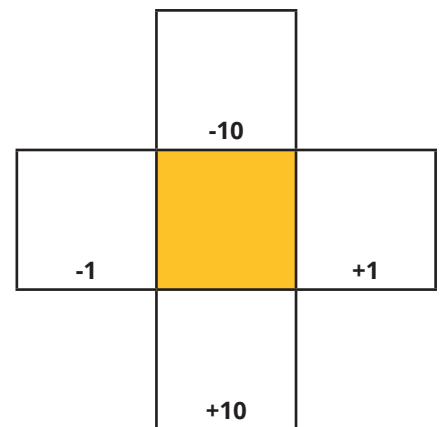

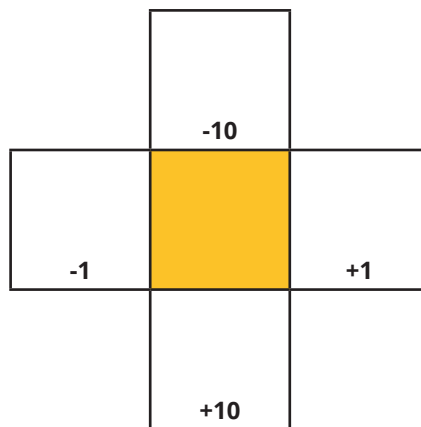

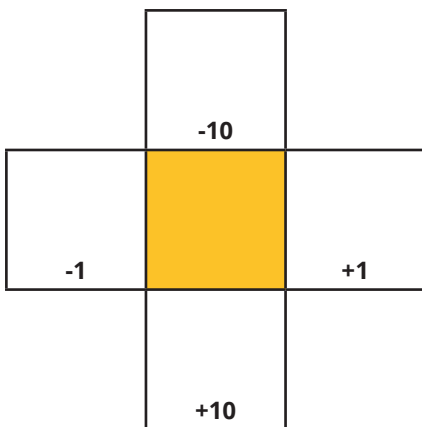

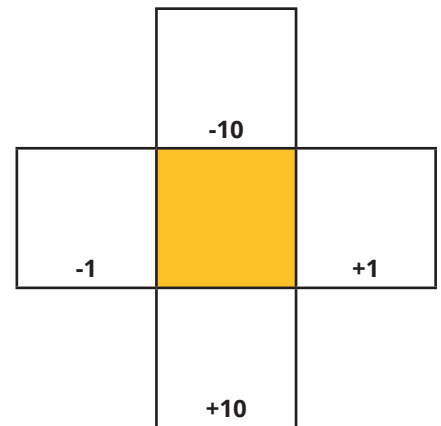

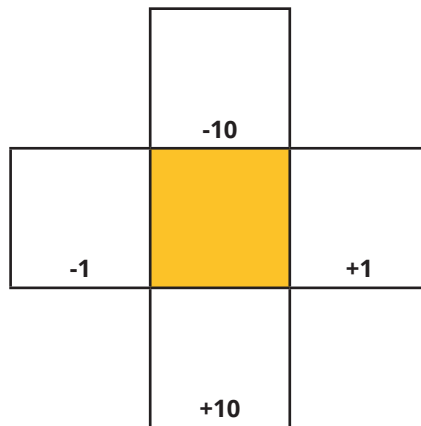

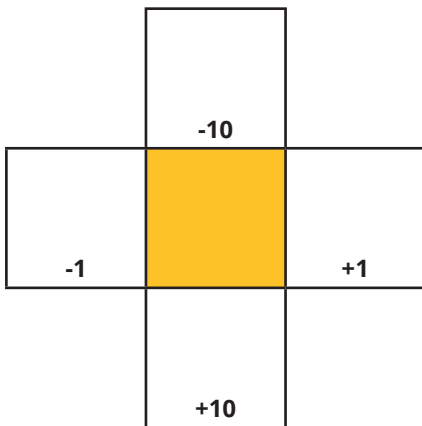

2. Couper le contour du carré gris. Evider la partie blanche en coupant sur les lignes. Plier sur les pointillés. Ainsi les onglets de couleurs permettent aux enfants de cacher la réponse et de leur laisser le temps de la réflexion puis ensuite de vérifier leur résultat.
